# **29th Intensive Training Course on Diagnostic Parasitology**

**For: Physicians, nurses, medical technologists, nutritionist-dietitians, physical therapists, occupational therapists, speech pathologists, midwives, sanitarians, teachers, professors, academicians, researchers, staff personnel**

Accurate laboratory diagnosis is an essential first step in the management of parasitic diseases both at the level of the individual patient and the community.

Microscopy is a mainstay in laboratory diagnosis. However it requires a high level of expertise to ensure reliability.

The new powerful tools of biochemistry, immunology and molecular biology complement microscopic diagnosis.

This 5-day intensive course on diagnostic parasitology aims to review, update and strengthen the knowledge and skills of health professionals involved in teaching, research and diagnostic work dealing with parasitic diseases.
