# Organizational Development for Health Care Institution

**For: Physicians, dentists, nurses, medical technologists, nutritionist-dietitians, physical therapists, occupational therapists, speech pathologists, teachers, professors, academicians, researchers, staff personnel**

Health Care Organizations need to manage organizational change effectively to survive and thrive in today's rapidly changing global economy. Organizational change is inevitable across a wide range of health care organizations: from small healthcare facilities to large complex state-of-the-art corporations, including government and non-government, profit and non-profit organizations. This course is geared towards the continuing education and update needs of Health Care Institution executives. OD also compliments strategic planning; it's an important tool in managing and planning organizational growth.
