23-27 July 2018

30th Intensive Training Course on Diagnostic Parasitology

For: Physicians, nurses, medical technologists, nutritionist-dietitians, physical therapists, occupational therapists, speech pathologists, midwives, sanitarians, teachers, professors, academicians, researchers, staff personnel

Accurate laboratory diagnosis is an essential first step in the management of parasitic diseases both at the level of the individual patient and the community.

Microscopy is a mainstay in laboratory diagnosis. However it requires a high level of expertise to ensure reliability.

The new powerful tools of biochemistry, immunology and molecular biology complement microscopic diagnosis.

This 5-day intensive course on diagnostic parasitology aims to review, update and strengthen the knowledge and skills of health professionals involved in teaching, research and diagnostic work dealing with parasitic diseases.
